Resume: Educating our growing children, who are considered the future of our country, in the spirit of patriotism in the conditions of information diversity is one of the most sacred, noble, precious and honorable tasks for every pedagogue, educator, parent and coach. This issue is one of the priority directions of our state policy.

Educating our growing children, who are considered the future of our country, in the spirit of patriotism in the conditions of information diversity is one of the most sacred, noble, precious and honorable tasks for every pedagogue, educator, parent and coach. This issue is one of the priority directions of our state policy.

Collective measures implemented in the education and training of students-students in higher education institutions have a special place.

"Parents, children, close relatives are precious to us; but all our imaginations in the chapter of love are embodied in one word "Homeland". If the love for the motherland is so great, what conscientious person would hesitate to give his life for it?", writes Cicero.

Professional educational institutions of the Republic of Uzbekistan are educational institutions that prepare professionally qualified personnel. Education in our country is primarily aimed at increasing and activating the effectiveness of work on educating young people in the spirit of patriotism, more actively involving citizens of our country, state and non-governmental non-profit organizations and other institutions of civil society in educational and educational work in this regard, and instilling feelings of patriotism and courage in the minds of young people. Resolution No. 140 of the Cabinet of Ministers of the Republic of February 23, 2018 "On approving the concept of educating young people in a military-patriotic spirit" [189], State educational standards, curricula and science programs are implemented on the basis of special training courses.

The following are defined as the main tasks of the above-recognized Concept:

- educating young people in the spirit of national ideals and loyalty to the Motherland, instilling in their hearts and minds that the protection of the Motherland is an honorable and sacred duty;

- to be proud of our ancient history and culture, our national heroes who selflessly fought for the independence and prosperity of our beloved Motherland, to form a sense of being worthy of them, to strengthen confidence in the power and potential of our national army;

- to strengthen the understanding that military service is a sacred duty for every citizen of Uzbekistan, as well as the theoretical and practical skills in this regard;

- forming in young people the skills of approaching the political and social processes taking place around us and in the world based on our national interests, ideological immunity against various internal and external threats;

- educating young people with the ability to make quick and independent decisions in any complex situations, to effectively use modern military equipment;

- To be ready to protect the interests of Uzbekistan not only in the military sphere, but also in all aspects of life, to be selfless for the country - to inculcate in the minds of young people through real examples and effective means that this is the demand of today explained.

The verification of the effectiveness of educating students in the spirit of patriotism in the conditions of information diversity reflects the logic of the educational patriotism process carried out in the educational institution, making every graduate a competent specialist required in the labor market, a true citizen-patriot, who conscientiously fulfills his constitutional duties, actively participates in public life and social life. He relied on active, axiological, historical and cultural approach in patriotic education of students. Relying on the active, axiological, historical and cultural approach in patriotic education of students; The most important factor in the formation of a patriotic worldview that meets the requirements of an educational institution is the development of important concepts in the face of patriotic education and their management in the context of information diversity.

The pace of continuous development of science and technology is related to the emergence of new information technologies that increase the volume and speed of information distribution, covering a large number of people with a huge flow of information on all continents and in a very short period of time; building a unified information space in international relations; dependence of political power on the state of information conflicts in external and internal spheres; national elite, various categories of citizens, especially young people, were found to be prone to targeted information and psychological influence. The content of the concept of patriotic education among future specialists is love for the Motherland, loyalty to the state of Uzbekistan, established patriotic outlook and beliefs, encouraging patriotic behavior, effective participation in the process, developing systematic and purposeful mechanisms for the formation and development of an active patriotic position, working for the Motherland and making it preparation for eyeball care is a sign of today's relevance. Technologies of education of pupils and young people are considered an important technological component of the system of patriotic education in a professional educational institution. Explaining, being an example, encouraging, stimulating (praise, criticism), self-education in the practice of patriotic education; Traditional methods are used, such as "round table", meetings with veterans, and meetings with active duty and reserve military officers. The quality and effectiveness of patriotic education in a professional educational institution is determined by taking into account the existing objective and subjective pedagogical conditions and environment in the process of patriotic education.

We saw the system of patriotism education of students in professional educational institutions as a basic component of formation of patriotism in future junior specialists in the conditions of information diversity of Uzbekistan. The patriotic training of pupils and youth is manifested as an integral part of the overall educational process; in this, the main organizational form of training is the educational process, extracurricular activities, the content of patriotic training is made up of

patriotic worldview, motivational and value orientations, social and spiritual values, physical maturity, patriotic activity skills and qualifications.
