Introduction of Innovative Methods in Educational Institutions

Nazirova Khilolakhon Mirzayakubovna

Student of Andijan State University

Annotation: This article deals with the introduction of innovative methods in educational institutions, current problems and solutions.

Keywords: education system, innovation, style, pedagogical education, technology, consistency, intellectual potential.

The reform of the system of continuing education in the Republic of Uzbekistan is in the future high professional culture, creative and social activity, socio-political of the younger generation to be able to participate independently in life, to develop the ability to think freely focused. This, in turn, determines the level of scientific knowledge and activity of students requires expansion. In the words of President Islam Karimov, "We a step towards building a modern state based on a developed market economy and ensure a consistent transition from a strong state to a strong civil society as long as we only deepen the need for the harmony of national and universal values understanding, modern knowledge, intellectual potential and advanced technology to the strategic development goals set for us only by the people we occupy we always have a good idea of what it can achieve."

Resource of educational institutions in the "Kadrlar tayyorlash milliy dasturi", further strengthening of personnel and information bases, new educational process full provision of educational and methodical complexes, advanced pedagogical technologies functions are defined.

Today

The education system in a country remains one of the main tasks, one of the most pressing issues. Developed countries of our country to accelerate the education of the population and its effectiveness in order to be included in the list

The goal of development is also broader than advanced pedagogical activities, technologies requires us to use.

Innovation is the introduction of innovation, innovation. Science and

Creating an Innovative Man in the Future Innovation Development Strategy,

that is, regardless of its performance, it must be prone to innovation and new knowledge.

Changing the pattern of communication between teacher and student is an innovative activity is one of the conditions. The effectiveness of innovative activities with the personality of the teacher determined.

To date, individual-creative and team-creative activity in education
